BOLT IS HEALTH MONITORING MADE EASY!

The BOLT Health Monitoring Kit from American Megatrends connects to your iOS®, Android™ or Windows® smartphone or tablet device to give you the power to manage your health! Just install the easy-to-use BOLT app to your mobile device for wireless control of the BOLT Base Unit and Accessories and have vital health information accessible on demand.

To get started, simply select the appropriate BOLT accessory - such as blood pressure cuff, thermometer, oximeter and more - for the health check you wish to perform. Plug it into the BOLT Base Unit, launch the BOLT app on your mobile device and follow along as the app guides you through the test with easy-to-follow instructions. The BOLT Base Unit wirelessly connects with the BOLT app on your iOS, Android or Windows mobile device to gather and display the results of your health measurement in a clear, concise dashboard view.

YOUR PERSONAL HEALTH ARCHIVE IN THE CLOUD

You can archive the information from BOLT to give you a historical view of vital health data as you build and maintain your Personal Health Record. Then upload and save your results to your Personal Health Cloud to view, share and analyze health trends and access them anytime, anywhere.

You can also share health data directly with your healthcare provider and add this information to your Electronic Medical Record (EMR), allowing you to take a more active and collaborative role in managing your health

- Extensible API to support integration with external health systems and web applications

and addressing ongoing health challenges.

TACKLE KEY HEALTH CHALLENGES WITH BOLT

The so-called “silent killer” diseases - such as heart disease, hypertension and diabetes - can produce little to no symptoms in

the early stages yet lead to death if not treated on time. They are also increasingly the leading cause of death of people around the globe. Fortunately, regular monitoring of health statistics with tools like the BOLT Health Monitoring Kit can help identify these silent killers and keep them at bay.

For example, recent research has shown that over 70% of high blood pressure patients kept their blood pressure under control by conducting regular monitoring at home. Similarly, the American Heart Association recommends home monitoring for all individuals with high blood pressure to assist healthcare providers in determining the efficiency of treatment.

The BOLT Health Monitoring Kit - together with iOS, Android or Windows device - gives you the power to tackle the “silent killers” and overcome these manageable health challenges with powerful monitoring and health data analysis tools!

ACCESSORY PLUG-INS
