

AMI Corporate Profile

POWER, MANAGE and SECURE connected devices by providing best-in-class UEFI and remote management firmware, software and utilities to top-tier manufacturers of desktop, server, mobile and embedded/IoT systems.

Established in 1985, the mission of AMI is to **power, manage** and **secure** connected devices by providing best-in-class UEFI and remote management firmware, software and utilities to top-tier manufacturers of desktop, server, mobile and embedded/IoT systems. In line with its technology focus, AMI is a member of numerous industry associations and standards groups, such as the Unified EFI Forum (UEFI), the NIST National Cybersecurity Excellence Partnership (NCEP) and the Trusted Computing Group (TCG).

POWER | Power-on Solutions

Power Firmware Solutions for all major silicon vendors, including Intel, AMD and Arm platforms. From initial bring-up to post production, AMI has the POWER.

MANAGE | Management Solutions

Management Solutions for out-of-band management of network devices, servers, racks and data centers with or without a BMC, SAN platforms, virtual machines and other devices, from traditional server platforms to telco edge devices.

SECURE | Security Solutions

Firmware security starts early in the development process of new technology. AMI applies its firmware security best practices in tandem with the leading silicon and operating system providers such as Intel® and Microsoft®. This process requires not only the efforts of the silicon and firmware providers, but also other key vendors in the system manufacturer's supply chain. With additional collaboration across the supply chain, the development process can be tuned to improve the overall security of the industry.

International Offices

AMI Corporate Headquarters
